EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments:

I am sorry the EPA is getting blamed for this, when this should have been a major Superfund Site, dealt with over 20 years ago, instead of being dealt with piecemeal out of fear of the moniker.
I worked on this issue, urging Superfund funding and major recognition back in the early 90s. This was a horror just waiting to happen. I am now a part-time Durango resident. What can we do now to demand that the mines around Silverton be treated as the major Superfund site it should be?
